

Thank you for your purchase.

This asset includes :

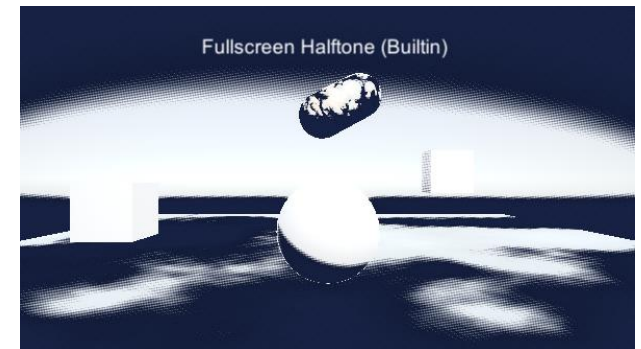

- * Object Half-tone shaders (Unified)

Adds a half tone effect to individual objects.
this shader is available for Built-in and URP.

- *Full-screen half-tone shaders(URP/Built in)

Full-screen shaders are used differently
in URP and Built-in (see below).

Object half tone shaders (Unified)

Set

Shader Graphs/HalfToneMono or
Shader Graphs/HalfToneColor
for the object's material.

Color : Half tone Color

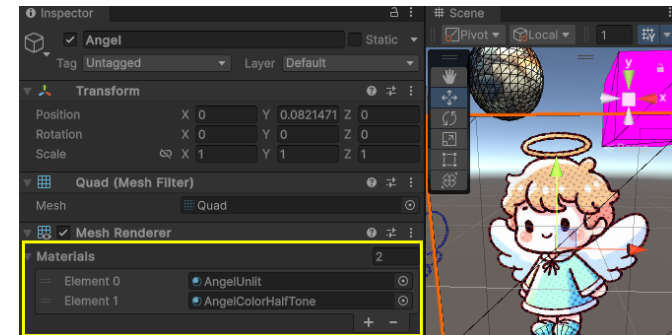

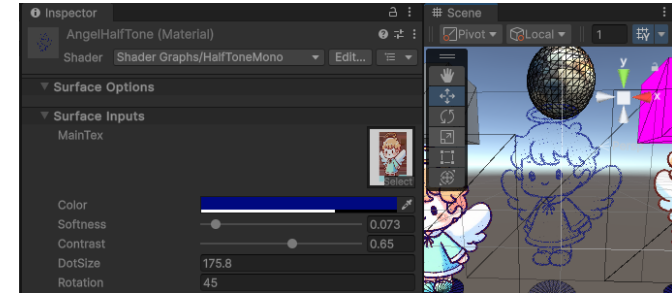

Softness : Softness of Color

Contrast : Contrast of image

DotSize : Half tone size

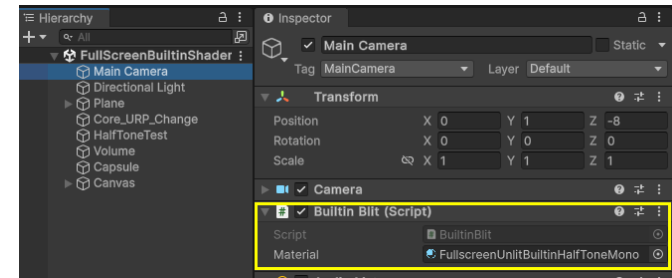

Rotation : Rotation of half tone

Halftone and other shaders can be combined.

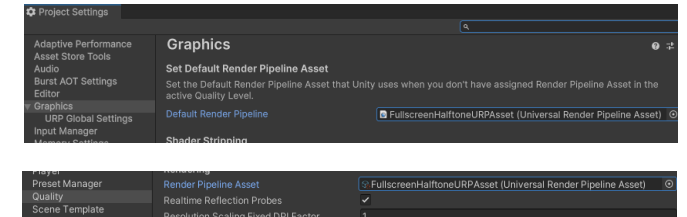

Full-screen shader(Builtin)

Attach Assets/HalfToneShader/Scripts/BuiltinBlit.cs to MainCamera, and set FullscreenUnlitBuiltinHalfToneMono or FullscreenUnlitBuiltinHalfToneColor .

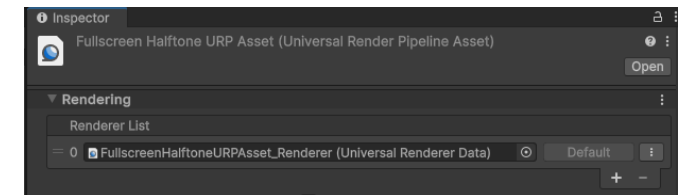

Full-screen shader (URP)

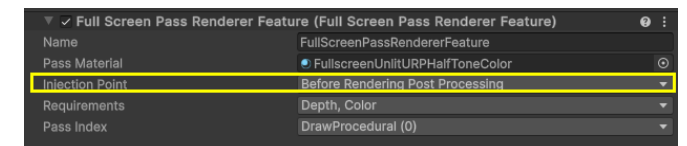

Open Edit>ProjectSettings, and set Graphics>DefaultRenderPipeline and Quality>RenderPipelineAsset to PipelineAssets/FullscreenDitherURPAsset.asset or PipelineAssets/FullscreenHalftoneURPAsset.asset.

If you want to use the other RenderPipeline, add PipelineAssets/FullscreenDitherURPAsset_Renderer or PipelineAssets/FullscreenHalftoneURPAsset_Renderer To your PipelineAssets>RendererList.

Select Injection point if you need.
